

**4-5 Homeostasis and response – Biology**

**1.0** Diabetes is a disease in which blood glucose (sugar) concentration may rise more than normal.

**1.1** Which organ in the body monitors this rise in blood sugar?

[1 mark]

Tick **one** box.

Adrenal

Pancreas

Pituitary

Thyroid

**1.2** One way of treating diabetes is by careful attention to diet.

**Figure 1** shows the recommended diet for a person with diabetes.

**Figure 2** shows a diet for a person without diabetes.

Give **two** ways in which the recommended diet of a person with diabetes is different from the diet of a person without diabetes.

[2 marks]

Recommendation 1: \_\_\_\_\_  
 \_\_\_\_\_

Recommendation 2: \_\_\_\_\_  
 \_\_\_\_\_

1.3 Other than diet, give **one** way in which diabetes may be treated.

[1 mark]

---

---

2.0 **Figure 3** shows the neurones and parts of the body involved in a response to touching a hot object.

A neurone is a nerve cell. Neurones carry impulses around the body.

2.1 What is **B**?

[1 mark]

Tick **one** box.

- Effector
- Motor neurone
- Relay neurone
- Sensory neurone

2.2 Synapses are one of the structures in a reflex arc.

Which part, **A**, **B**, **C** or **D** is a synapse?

[1 mark]

Tick **one** box.

**A**

**B**

**C**

**D**

**2.3** The hand touches a hot object.

An impulse travels through the nervous system to the muscle (point **D**). The muscle moves the hand away from the hot object.

What does the muscle do to move the hand away from the hot object?

[1 mark]

---

**2.4** The action described in **2.3** is a reflex action.

How can you tell that this action is **not** a conscious action?

[1 mark]

Use information from the diagram.

---

---

2.5 Some students investigated the effect of caffeine on a person's reaction time.

The students used the following steps.

1. One student held a ruler just above a second student's hand, as shown in **Figure 4**.

**Figure 4**

2. The student let go of the ruler. The second student caught it as soon as possible, as shown in **Figure 5**.

**Figure 5**

3. The students repeated this experiment seven more times.
4. The student catching the ruler then drank a cup of strong coffee. Coffee contains caffeine.
5. Fifteen minutes after drinking the coffee the students repeated steps 1 to 3.

Table 1 and Table 2 show the students' results.

Distance ruler fell before it was caught in cm
<b>Before drinking coffee</b>
17
21
24
16
20
16
13
21
<b>Mean = 18.5</b>

Distance ruler fell before it was caught in cm
<b>After drinking coffee</b>
8
13
11
16
9
14
13
13
<b>Mean = 12.2</b>

What is the mode for the results after drinking coffee?

[1 mark]

---

**2.6** The students used the reading on the ruler as a measure of the reaction time. What can you conclude about the effect of caffeine on reaction time?

[1 mark]

---

---

**2.7** Which of the statements below show that the experiment was repeatable, and which show that it was reproducible?

[2 marks]

	<b>Repeatable</b>	<b>Reproducible</b>
The same student repeated the experiment		
The same student got similar results each time		
A different student repeated the experiment		
A different student got similar results each time		

**3.0** Figure 6 shows the position of two glands, **A** and **B**, in a woman.

**Figure 6**

**3.1** Name glands **A** and **B**.

[2 marks]

**A** \_\_\_\_\_

**B** \_\_\_\_\_

**3.2** Gland **A** produces the hormone Follicle Stimulating Hormone (FSH).  
FSH controls changes in gland **B**.

Describe how FSH moves from gland **A** to gland **B**.

[1 mark]

\_\_\_\_\_

**3.3** Oestrogen is a reproductive hormone.  
Which gland secretes oestrogen?

[1 mark]

\_\_\_\_\_

**3.4** A woman is not able to become pregnant.

The woman does not produce mature eggs. The doctor treats the woman by giving her injections of hormones.

Which **two** hormones will help the woman produce and release mature eggs?

**[2 marks]**

Tick **two** boxes.

- |                                    |                          |
|------------------------------------|--------------------------|
| Follicle Stimulating Hormone (FSH) | <input type="checkbox"/> |
| Luteinising Hormone (LH)           | <input type="checkbox"/> |
| Oestrogen                          | <input type="checkbox"/> |
| Progesterone                       | <input type="checkbox"/> |
| Testosterone                       | <input type="checkbox"/> |

**3.5** Hormones control some actions in the body. The nervous system controls some actions as well. Reflex actions are part of the nervous system.

Give **two** ways in which a hormone controlled action is different from a reflex action.

**[2 marks]**

1 \_\_\_\_\_

\_\_\_\_\_

2 \_\_\_\_\_

\_\_\_\_\_

**3.6** There are different types of contraception that are used to prevent pregnancy.

Explain how hormonal and non-hormonal methods of contraception prevent pregnancy occurring.

**[2 marks]**

Hormonal methods \_\_\_\_\_

\_\_\_\_\_

Non-hormonal methods \_\_\_\_\_

\_\_\_\_\_

3.7 A new fertility treatment that could allow women to have IVF in their lunch hour has been developed.

Figure 7 shows the *Invozell* device.

Figure 7

*Invozell* is a sealed capsule that allows fertilisation to take place inside the woman's body, in the vagina.

- Eggs are removed from the ovaries while the woman is under sedation.
- The eggs and sperm are put into the *Invozell* capsule.
- The capsule is placed inside her vagina.
- After three days the capsule is removed and the best embryo is transferred to the woman's womb.

This IVF treatment can be performed in a doctor's surgery because at no time are eggs, sperm or embryo stored outside the body. No costs are involved for laboratory incubation.

Evaluate the use of the *Invozell* technique compared with standard IVF treatment.

---

---

---

---

---

---

---

---

---

**4.0** Blood glucose concentration is monitored and controlled by the pancreas.

Explain what would happen to maintain blood glucose concentration if somebody ate some glucose tablets.

**[4 marks]**

---

---

---

---

---

---

**5.0** A student investigated growth in plants.

The student:

- planted a seed in damp soil in a plant pot
- put the plant pot in a dark cupboard.

**Figure 8** shows the result after five days.

**5.1** Compare the growth of the root and shoot after five days.

**[2 marks]**

---

---

---

---

In another investigation a student put the plant pot by a window with lots of light.

**Figure 9** shows the plant.

**5.2** Complete **Figure 10** to show the appearance of the student's plant after 20 days by the window.

[1 mark]

**5.3** Name the plant hormone that causes the plant to grow in the way you have shown in **5.3**

[1 mark]

\_\_\_\_\_

**6.0** The kidneys remove waste materials from the liquid part of the blood.

**Table 3** shows the concentration of certain substances

- in the liquid part of the blood
- in the liquid that has just been filtered from the blood in the kidneys
- in the solution in the bladder.

**Table 3**

Substance	Concentration (%)		
	In liquid part of blood	In liquid that has been filtered in the kidneys	In liquid in the bladder
<b>Protein</b>	7.0	0	0
<b>Salt</b>	0.35	0.35	0.5
<b>Glucose</b>		0.1	0
<b>Urea</b>	0.03	0.03	

**6.1** Suggest the concentration of glucose in the blood.

[1 mark]

---

**6.2** Suggest the concentration of urea in the bladder.

[1 mark]

---

**6.3** What happens to the glucose in the liquid that is filtered in the kidneys?

[1 mark]

---

**6.4** Explain why the concentration of salt in the liquid in the bladder is greater than the concentration of salt in the liquid that is filtered in the kidneys.

[1 mark]

---

---

**7.0** One group of students are working in a hot desert and another group is working in a tropical rainforest.

**Table 1** shows information about the students and the conditions in the desert and the rainforest.

**Table 1**

Information	Hot desert	Rainforest
Mean core body temperature of students in °C	37.3	38.9
Air temperature in °C	36.0	35.5
Mean percentage concentration of moisture in the air	9.0	92.0
Mean wind speed at ground level in metres per second	12.0	3.0

Both groups of students are doing similar jobs. The jobs cause the students to sweat a lot.

**7.1** Use information from **Table 1** to explain the difference in the mean core body temperature of the two groups of scientists.

**[2 marks]**

---

---

---

---

**7.2** Changes to blood vessels in the skin help to decrease body temperature. Explain how.

**[2 marks]**
