

Careers in Maths

Actuary
Accountant
Data scientist
Engineer
Insurance broker
Investment banker
Teacher

Maths is a crucial skill within any job or career. Adults with good numeracy skills earn much higher wages and are more likely to be in meaningful employment than those who fail to master these skills.

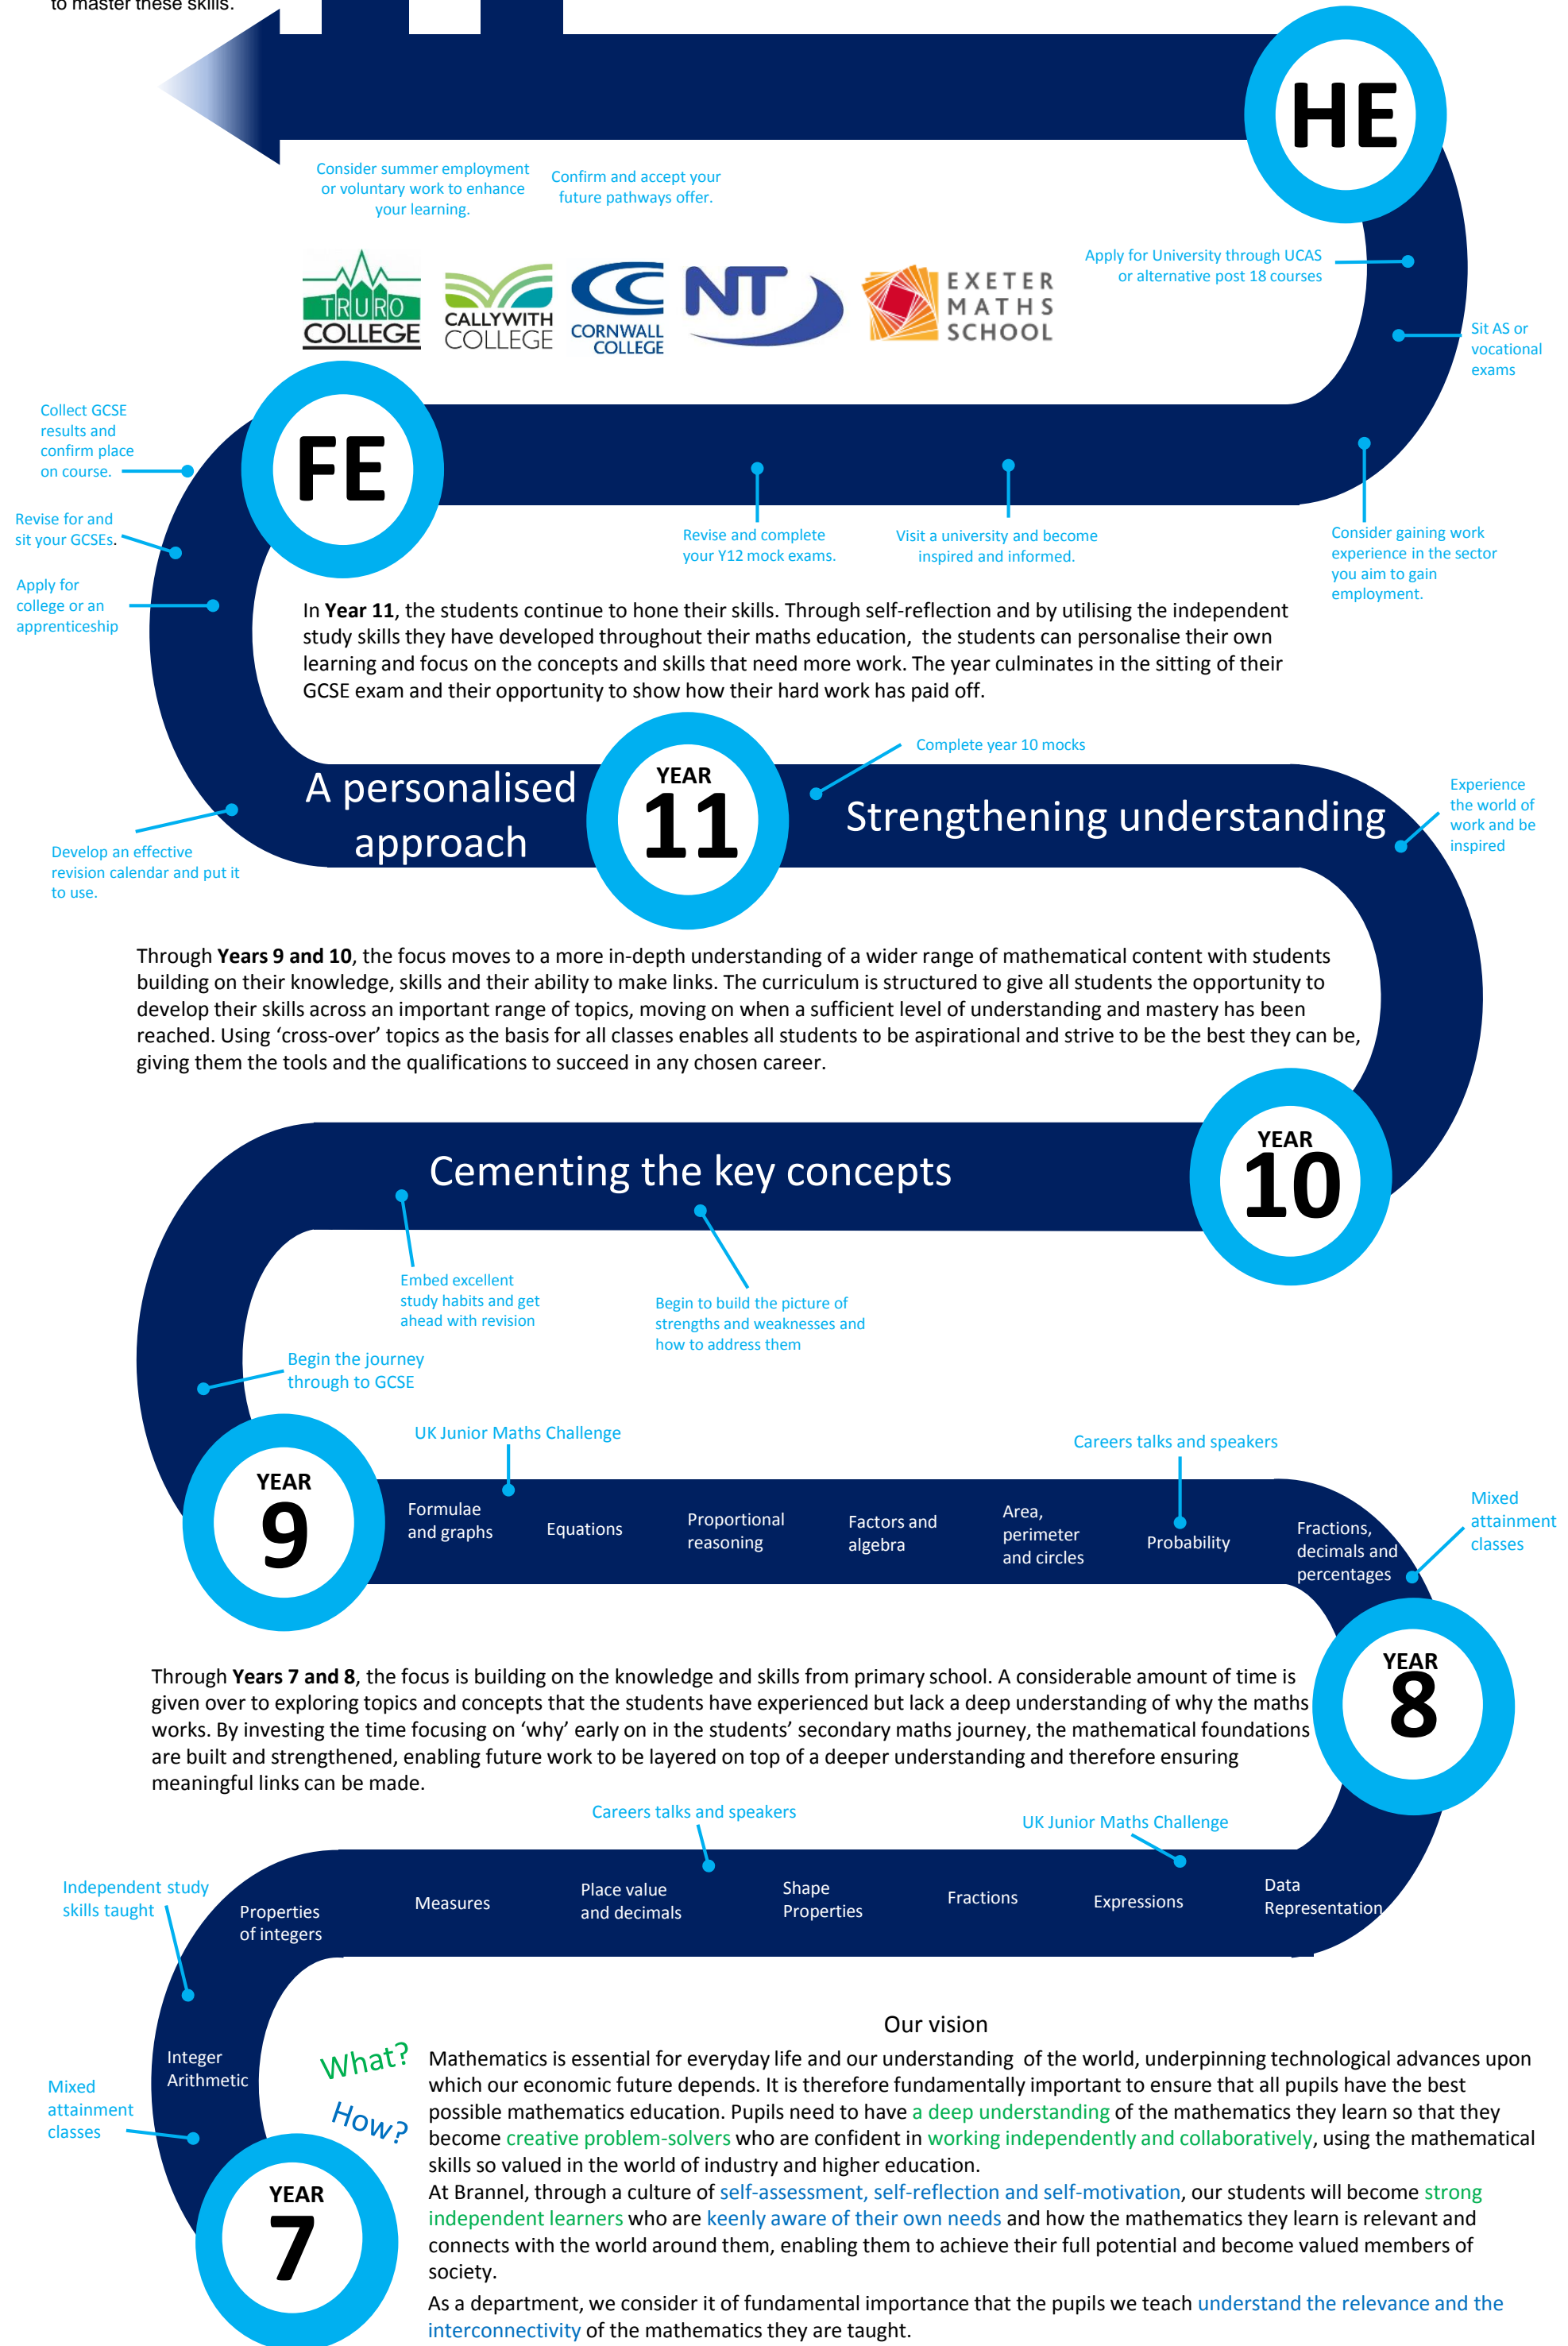

BRANNEL

Maths Learning Journey

"Mathematics is not about numbers, equations, computations, or algorithms: it is about understanding." William Thurston

"Success in maths does not depend on how many answers you know, but by what you do when you don't know the answer." —Unknown

'When am I ever going to need this in life?' is a question that regularly pops up in a maths classroom. It is our duty as teachers of mathematics to open pupils' eyes to the relevance and importance of the maths they are learning, whether that means **applying it to real-life situations where appropriate** or championing the **inherent beauty of problem-solving** and the transferable nature of this skill. We are aware and understand that not all pupils will go on to study maths at a higher level but it is our core purpose to instil an **appreciation of maths** in every student we teach.
